How to read the marking UNI EN 12209:05

Classification for mechanical locks (lateral locking).

3	X	8	0	0	G	2	H	A	2	0
Category of use	Durability and load on latchbolt	Door mass and locking force	Suitability for use on fire/smoke resistant doors	People's safety	Corrosion resistance and temperature requirement	Goods' security and drill resistance	Field of door application	Type of key operation and locking	Type of spindle operation	Key identification requirement

Category of use
There are three grades (example: grade 1: for residential doors, grade 2: for offices doors, grade 3: for doors in public buildings)

Durability and load on latchbolt
There are twelve grades (example: grade A: 50.000 operations and no load on latchbolt
grade X: 200.000 operations and 120 N load on latchbolt)

Door mass and locking force
There are nine grades (example: grade 1: up to 100 kg door mass with 50 N maximum locking force, grade 9: over 200 kg door mass with 15 N maximum locking force)

Suitability for use on fire/smoke resistant doors
There are two grades (example: grade 0: non suitable for use on fire/smoke resistant door, grade 1: suitable for use on fire/smoke resistant door)

People's safety
There is only one grade: grade 0: no safety requirement

Corrosion resistance and temperature requirement
There are eight grades (example: grade 0: no corrosion resistance and temperature requirement, grade G: very high corrosion resistance and temperature requirement from -20°C up to +80°C)

Goods' security and drill resistance
There are seven grades (example: grade 1: minimum security and no drill resistance, grade 7: very high security and drill resistance)

Field of door application
There are fifteen grades (example: grade A: mortice lock for sliding or hinged door, grade T: rim lock for sliding or hinged door, front plate not supported)

Type of key operation and locking
There are nine grades (example: grade A: cylinder lock or latch; manually locking,
grade H: lock without key operation and automatically locking)

Type of spindle operation
There are five grades (example: grade 0: lock or latch without follower, grade 4: lock or latch for heavy duty unsprung lever handle operation specified by the manufacturer)

Key identification requirement
There are nine grades (example: grade 0: no requirements, grade H: minimum eight detaining elements, extended number of effective differs)

For further information please refer to UNI EN 12209:05 standard

How to read the marking prEN 15685

Classification for mechanical locks (multipoint locking).

3	X	8	A	0	G	7	3	0
Category of use	Durability and load on latchbolt	Door mass and locking force	Suitability for use on fire/smoke resistant doors	Key identification requirement	Corrosion resistance and temperature requirement	Security for locking points	Security for anti-separation points	Clenching points

Category of use
There are three grades (example: grade 1: for residential doors, grade 2: for offices doors, grade 3: for doors in public building)

Durability and load on latchbolt
There are ten grades (example: grade A: 50.000 operations and no load on latchbolt for locks without latchbolt, grade Z: 500.000 operations and 120 N load on latchbolt)

Door mass and locking force
There are ten grades (example: grade 1: up to 100 kg door mass and 50 N maximum locking force, grade 9: over 200 kg door mass and 15 N maximum locking force)

Suitability for use on fire/smoke resistant doors
There are three grades (example: grade 0: non suitable for use on fire/smoke resistant door, grade B: suitable for use on fire/smoke resistant door)

Key identification requirement
There are nine grades (example: grade 0: not applicable, grade H: minimum eight detaining elements, extended number of effective duffers)

Corrosion resistance and temperature requirement
There are eight grades (example: grade 0: no corrosion resistance and no temperature requirement, grade G: very high corrosion resistance and temperature requirement from -25°C up to +70°C)

Security for locking points
There are six grades (example: grade 0: no security requirements, grade 7: very high security with drill resistance)

Security for anti-separation points
There are eight grades (example: grade 0: no declared anti-separation points, grade 7: very high performance with drill resistance)

Clenching point
There are five grades (example: grade 0: no clenching force requirements, grade 4: clenching force = 120 N)

For further information please refer to prEN 15685 standard

Perforza

Multipoint lock

Performa

PERFORMA by Iseo has been conceived and developed to meet the requirements of the European market by adopting two different centre distances: 85 and 92 mm. It can be operated by a European-profile cylinder with straight or 45° projecting cam. The top and bottom lock housings incorporate low friction chamfered sliding deadbolts providing a perfect alignement into the keeps. The unique locking action of these chamfered bolts when combined with the latest generation of profiles helps maintain weather seal compression for better thermal insulation and energy saving.

It has been designed and tested

according to the European standards EN 12209:05 and prEN 15685:09.
It resists lateral forcing with a thrust of over 1,000 kg and a front load of over 600 kg.
The corrosion resistance is more than 240 hours in a saline environment.
Endurance: tested to over 200,000 opening and closing cycles under a 120N load.

Example of certification: multipoint lock Performa models 7232 – 7235

3	X	8	A	0	G	6	0	3

It's compatible

The lockcase has a width of 15 mm and, therefore, suits any type of applications for different frames materials.

It's sealed

The lockcase is closed on all sides: this stops profile machining chips from entering the mechanism. The lock is equipped with a wheel-cam stopping device in case the cylinder is not present into the housing of lock.

Easy locking

The gear box allows for a smoother and easier operation whilst turning the key during opening and closing.

It's solid

Version with hardened deadbolts available on demand, providing greater resistance against cutting and drilling.

It's well equipped

PERFORMA is well equipped with accessories to modify the lock: with a latch, a roller or a blanking cap for DEADBOLT only action.
Such a versatile lock makes for a streamlined stockholding.

Multiblindo eMotion

Electromechanical automatic lock

Multiblindo eMotion

Perfect combination of comfort and security in any situation.
The new electromechanical automatic lock represents the electronic evolution of Multiblindo Easy.
From the outside it operates by key or the most advanced electronic access control systems: fingerscan, keyboard, transponder, PIN-code. From the inside it operates electronically in a simple and fast way through a normal keyboard, allowing the end user to set three different locking functions: Total, Light, Free.

It is certified

according with EN14846:08 and prEN15685:09 European standards.
Multiblindo eMotion ensures top-level intrusion protection; it doesn't lose the settings in case of a black-out and, if necessary, it always assures the mechanical key or handle action.

Example of certification:

3	X	8	0	0	M	7	1	3

With sound feedback

A special system monitors the door status and sends opening and closing sound signals, which can be set or completely excluded by the end user.

Set your time

The user can set the time span between the opening pulse and the automatic relocking of the door.

Multiblindo eMotion has three options allowing an instant opening as well as to choose the automatic relocking mode according to the user's security requirements. It is operated through an electronic control for all the settings.

Total. When pressing the pushbutton the door opens and a sound signal is produced. When it closes, Multiblindo eMotion will automatically trigger the latchbolt and deadbolts: the sound feedback will indicate the total locking. Total security: this setting ensures your door the highest security.

Light. When pressing the pushbutton the door opens and a sound signal is produced. When it closes, Multiblindo eMotion will automatically trigger the latchbolt only: a different and more flexible security level for a partial and fast locking.

Free. With this setting, Multiblindo eMotion keeps the latchbolt and deadbolts completely unlocked: the door will stay in a free-opening status, in the classic hold-open situation. Total freedom ensuring a free access both from inside and outside until a new setting is given.

Conventional definition of door handing.

Multiblindo Easy

Automatic lock

Multiblindo Easy

It is a Multiblindo by all means: same sizes and dimensions, same security level. But it is an all-new Multiblindo, **conceived with 3 different functions to be set by the end user.**
To use Multiblindo Easy you need to apply an external fixed knob or a pull handle; as a matter of fact, a “classic handle” would unlock the door (emergency function).

It has been designed and tested

according to the European standard prEN 15685.
It resists lateral forcing with a thrust of over 1,000 kg and a front load of over 600 kg.
The corrosion resistance is more than 240 hours in a saline environment.
Endurance: tested to over 200,000 opening and closing cycles under a 120N load.

Example of certification: lock Multiblindo Easy, models 7A32 – 7A34 – 7A36 – 7A38

3	X	8	A	0	G	7	3	0

Locking.

The outstanding feature of Multiblindo Easy is the automatic locking of the latchbolt and deadbolts, which comes into operation when the door is pulled close to the door jumb. The end user may change the operating mode by switching the selector placed on the lock faceplate. A special patented device allows the deadbolts to come out of the cases only when the latchbolt goes into the striking plate for at least 3 mm. The latchbolt aligns perfectly the wing to the door jamb; this operation ensures the best condition for the free movement of the deadbolts.

Opening.

Outside opening: the deadbolts are unlocked with a single turn of the key in the opening direction; the latchbolt is unlocked with a further ¼ turn.
Inside opening: the deadbolts are unlocked with a single turn of the key in the opening direction; the latchbolt is unlocked with a further ¼ turn.
Latchbolt and deadbolts are unlocked with 45° lever rotation.

Lever block.

The lever operation inside is blocked with a single turn of the key in the closing direction.
The operation is restored with single turn of key in the opposite direction. To avoid incorrect or accidental use, the lever block operation is only allowed when the deadbolts are completely locked. This also ensures that:
• deadbolts automatic locking is fully completed
• deadbolts connecting rod has been blocked (an attack on one of the deadbolts does not damage the others). As far as security is concerned, the lever block prevents the opening from inside if required, or from outside in the event of a door breaking (i.e. glass frame doors).
In terms of safety it ensures a better exit control.

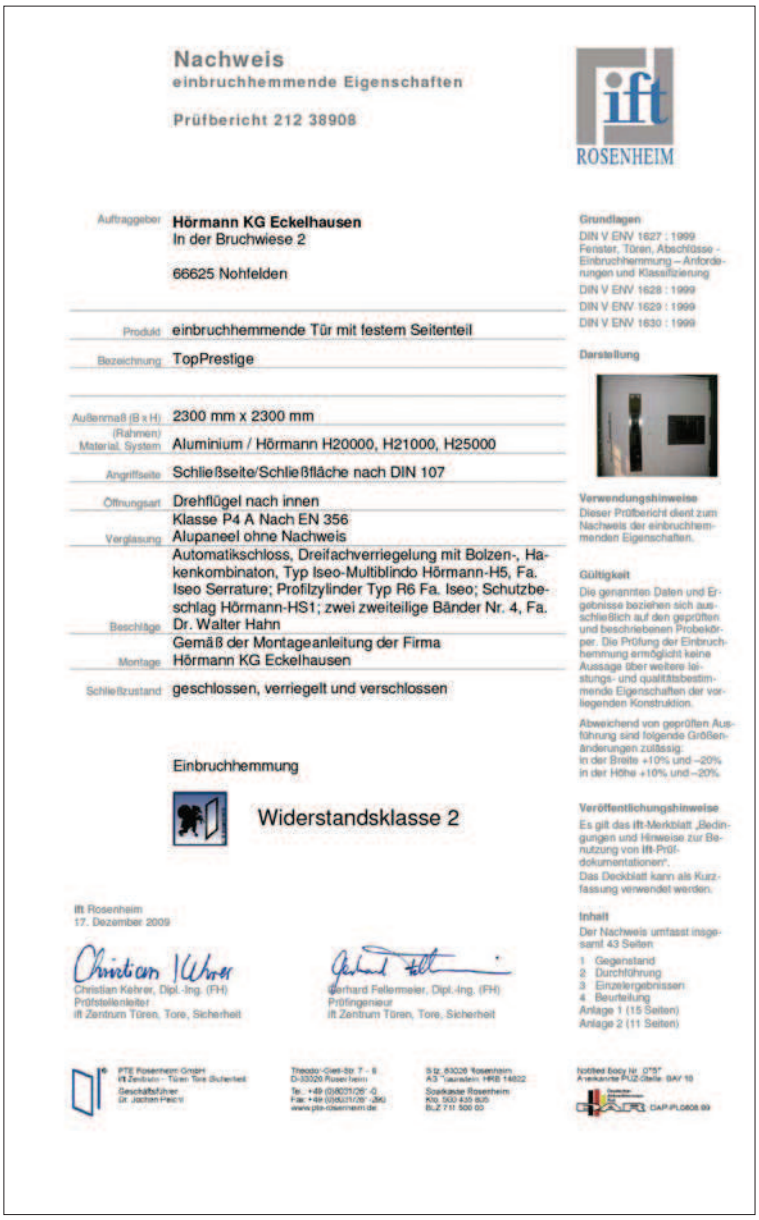
Total “0” **Deadbolts and latchbolt automatic locking**

Light “1” **Locking by latchbolt only**

Free “2” **Setting without locking** (it allows to set the hold-open function)

Multiblindo Easy

The door fitted with a Multiblindo Easy lock and tested by the **German Institute IFT ROSENHEIM** passed **CLASS 2 test according to EUROPEAN STANDARD DIN V ENV 1627:1999**



Nachweis
einbruchhemmende Eigenschaften

Prüfbericht 212 38908

ift ROSENHEIM

Auftraggeber	**Hörmann KG Eckelhausen** In der Bruchwiese 2 66625 Nohfelden
Produkt	einbruchhemmende Tür mit festem Seitenteil
Bezeichnung	TopPrestige
Außenmaß (B x H)	2300 mm x 2300 mm
(Rahmen) Material, System	Aluminium / Hörmann H20000, H21000, H25000
Angriffseite	Schließseite/Schließfläche nach DIN 107
Öffnungsart	Drehflügel nach innen
Verglasung	Klasse P4 A Nach EN 356 Alupaneel ohne Nachweis
Beschläge	Automatikschloss, Dreifachverriegelung mit Bolzen-, Hakenkombinaton, Typ Iseo-Multiblindo Hörmann-H5, Fa. Iseo Serrature; Profilzylinder Typ R6 Fa. Iseo; Schutzbeschlag Hörmann-HS1; zwei zweiteilige Bänder Nr. 4, Fa. Dr. Walter Hahn
Montage	Gemäß der Montageanleitung der Firma Hörmann KG Eckelhausen
Schließzustand	geschlossen, verriegelt und verschlossen

Darstellung

Verwendungshinweise
Dieser Prüfbericht dient zum Nachweis der einbruchhemmenden Eigenschaften.

Gültigkeit
Die genannten Daten und Ergebnisse beziehen sich ausschließlich auf den geprüften und beschriebenen Probekörper. Die Prüfung der Einbruchhemmung ermöglicht keine Aussage über weitere leistungs- und qualitätsbestimmende Eigenschaften der vorliegenden Konstruktion.

Abweichend von geprüften Ausführung sind folgende Größenänderungen zulässig:
in der Breite +10% und –20%
in der Höhe +10% und –20%

Veröffentlichungshinweise
Es gilt das ift-Merkblatt „Bedingungen und Hinweise zur Benutzung von ift-Prüfdokumentationen".
Das Deckblatt kann als Kurzfassung verwendet werden.

Inhalt

MULTIPOINT mortice lock for metal frames,
AUTOMATIC LOCKING OF THE LATCHBOLT AND 3 DEADBOLTS, **ROTATING HOOK DEVIATORS**.
Central lock, centre distance mm 92, operating with European profile cylinder.
Right or left latchbolt, **non reversible**. Deadbolts and latchbolt operated by key or handle.
Lock and deviators deadbolts, mm 27 throw, with anti-drill and anti-cut cover plates in carbonitrided steel.
2 nylon end blocks for U-version. Fixing screws. Instruction sheet.

Accessories to be ordered separately:
Striking plates
Front plate in stainless steel 24x6x1860:
mechanical strikers 033202 - 033203
electric strikers 033212 - 033213
strikers for deviators 033167 - 033171
Flat front plate in stainless steel 24x3x2300:
mechanical strikers 033200 - 033201
electric strikers 033210 - 033211
strikers for deviators 033165 - 033169

Multiblindo classic

Lock for metal frames

Multiblindo classic

It has been designed and tested

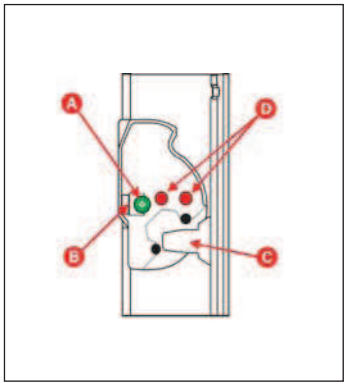
according to the European standards EN 12209:05 (lateral locking version) and prEN 15685 (3-point locking version).
It resists lateral forcing with a thrust of over 1,000 kg and a front load of over 600 kg.
The corrosion resistance is more than 240 hours in a saline environment.
Endurance: tested to over 200,000 opening and closing cycles under a 120N load.

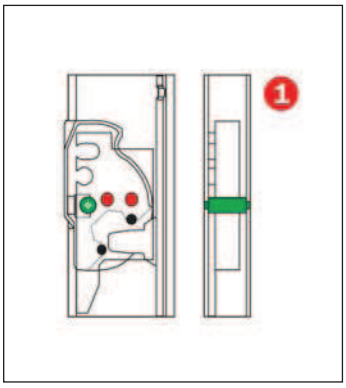
Example of certification lock Multiblindo, series 7955 - 7945 - 7991 - 79034

3	X	8	A	0	G	7	3	1

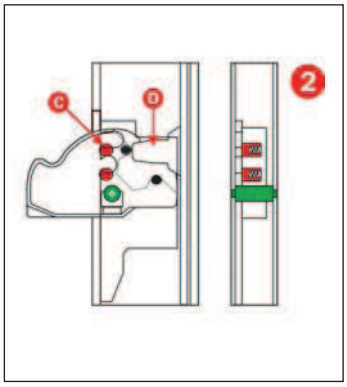
Adopting MULTIBLINDO, together with ISEO cylinders range, means reaching an extremely high security standard to the doors.
MULTIBLINDO's security features include:
- steel lock case, closed on all sides;
- reinforced deadbolts with carbon-nitrite steel layers for high cut and drill protection;
- new deadbolt system (patented) preventing cracking (fig. 2,3,4);
- external forces applied on one of the deadbolts have no effect on the other two, which means that any eventual cracking attempts would have to be repeated separately for each deadbolt.

A) DEADBOLT fulcrum pin
B) Programmed breaking point
C) Security pins
D) Movement transmission and DEADBOLT locking rod

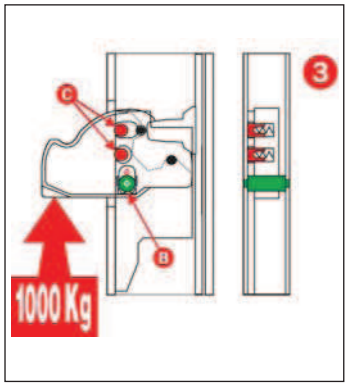




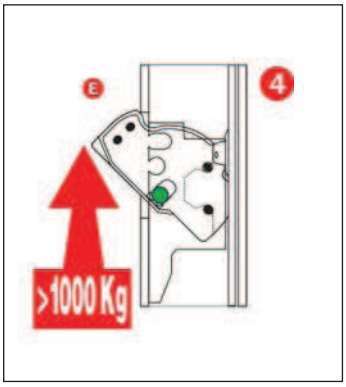
Open lock



Closed lock. Blocking is ensured by element "D", which opposes the deadbolt and secures it against the back wall of the lock case.
Pins "C" are not operating.



By appling an upwards force, equivalent to one metric ton, breaking point "B" yields letting pins "C" insert themselves into their respective spaces in the plate consolidated to the lock case. The dead bolt and the case fundamentally become one single body



The deadbolt can no longer enter again the lock case when its rotation axis is moved, as it interferes with the front plate "E".

Multiblindo classic

The door fitted with a Multiblindo lock and tested by the **German Institute IFT ROSENHEIM**, passed **CLASS 3 test according to EUROPEAN STANDARD DIN V ENV 1627:1999**

Kurzbericht
Nr. 212 24151

ift ROSENHEIM

Auftrag	Prüfung der einbruchhemmenden Eigenschaften nach DIN V ENV 1627
Auftraggeber	**Tegtmeier GmbH & Co. KG Metallbauwerk** Oeynhausener Str. 40 32584 Löhne/Westfalen
Probekörper	
Prüfdatum	26. Juli 2001
Produktbezeichnung	„**Tebau Therm 80**"
Bauart	einflügelige Aluminiumrahmentür mit Seitenteil
Angriffseite	Schließseite / Schließfläche gemäß DIN 107
Außenabmessungen	1400 mm x 2100 mm (B x H)
Rahmenmaterial	Aluminium
Profilsystem	TT80
Konstruktionsfugen	Schattenfuge 4mm, unten 20 mm
Beschläge [1])	Schloss Fa. ISEO Multi Blindo nach DIN 12209 Klasse 5 mit Profilzylinder der Fa. Dom, Art.-Nr.: 25 500 91 sowie mit verdecktliegendem Band der Fa. Tebau.
Verglasung	nach DIN 52290 - B1
Paneel	nach DIN 52290 – B3
Montage	Montageanleitung Stand Januar 2001, Blatt 1
Ausführungsvarianten	- Abweichungen von der geprüften Größe gemäß DIN V ENV 1627 in der Breite maximal + 10% und – 20 % und in der Höhe maximal + 10% und – 20 %. - weitere Ausführungsvarianten siehe Anlage 1, Blatt 1

Ergebnis
Der Probekörper erfüllt die Anforderungen an einbruchhemmende Türen der

Widerstandsklasse 3 nach **DIN V ENV 1627 : 1999**

Verwendung von ift-Prüfberichten
Entsprechend dem **ift**-Merkblatt und nur so lange, wie sich die Bauart des Produktes sowie der Inhalt und die Gültigkeit der Norm nicht ändern.

MULTIBLINDO mortice lock for metal frames, 3-POINT LOCKING, **MODULAR**, **ROTATING DEADBOLT**.
Central lock, centre distance mm 92, operating with European profile cylinder.
Front plate with holes for additional deviators. Rotating deadbolt,
mm 27 throw with antidrill/anticut cover plates in carbonitrided steel.
Supplied with reversible and adjustable latchbolt. The latchbolt can be replaced with roller or cap for deadlocking only. Latchbolt/roller retainer by key or mm 8 handle follower.
Built-in connecting rods between lock and deviators. 2 nylon end blocks for U-version.
Fixing screws. Instruction sheet.

Accessories to be ordered separately:
Rotating deadbolt deviator - ref. N. 790330000
Rotating hook deviator - ref. N. 790340000
Bottom-locking deviator - ref. N. 790310000
